AMENDMENTS TO THE CLAIMS

Please cancel claims 8, 10 and 14, amend claims 1, 2, 3, 6 and 11-13, and add new claim 15, as follows:

Claim 1 (Currently Amended) A lubricant composition additive comprising:

a succinimide compound or a boronization product thereof (A), wherein the succinimide compound (A) is represented by the following general formula (1) and is obtained by reacting (a) a succinic acid substituted with [[an]] a linear alkenyl or alkyl group having 6 to 30 carbon atoms or an anhydride thereof with (b) a polyalkylenepolyamine comprising 20-100 mole % of a polyalkylenepolyamine having a ring structure at an end, based on an entire amount of the polyalkylenepolyamine:

$$R^{1} \longrightarrow N \longrightarrow ((CH_{2})_{m} \longrightarrow NH)_{n} \longrightarrow (CH_{2})_{m} \longrightarrow A$$
 (1)

wherein

R¹ represents an alkenyl or alkyl group having 6 to 30 earbon atoms a linear alkenyl group having 6-30 carbon atoms or a linear alkyl group having 6-30 carbon atoms,

m represents an integer of 2 to 4,

n represents an integer of 0 to 3, and

A represents the ring structure in the polyalkylenepolyamine having a ring structure at an end or a mixed structure comprising the ring structure and an amino group; and

a succinimide compound or a boronization product thereof (B) having a number-average molecular weight of 500 to 5,000 and is substituted with an alkenyl or alkyl group,

wherein the lubricant additive is for driving systems composition is for an automatic

transmission.

Claim 2 (Currently Amended) The lubricant <u>composition</u> additive according to Claim 1, wherein the ring structure in the polyalkylenepolyamine having a ring structure at an end is a ring structure represented by the following general formula (2):

$$(CH_2)_p$$
NH (2)

wherein p and q each independently represent an integer of 2 to 4.

Claim 3 (Currently Amended) The lubricant <u>composition</u> additive according to Claim 1, wherein the polyalkylenepolyamine having a ring structure at an end is aminoethylpiperazine.

Claims 4-5 (Cancelled).

Claim 6 (Currently Amended) The lubricant composition additive according to Claim 1, wherein the succinimide compound or the boronization product thereof (A) is a compound having a linear alkenyl or alkyl group having 6 to 30 carbon atoms which is bonded at an end portion or an intermediate portion of the alkenyl or alkyl group.

Claims 7-10 (Cancelled).

Claim 11 (Currently Amended) The lubricant composition according to Claim [[8]] 1, which is a lubricant composition for wherein the automatic transmission is a continuous variable transmissions transmission.

Claim 12 (Currently Amended) The lubricant composition additive according to Claim 1, wherein the succinimide compound (B) is represented by the following general formula (3) and is obtained by reacting (a) a succinic acid substituted with an alkenyl or alkyl group having 30 to 300 carbon atoms or an anhydride thereof with (b) a polyalkylenepolyamine comprising a polyalkylenepolyamine having at an end thereof a ring structure, an amino group having no ring structure or a mixed structure comprising the ring structure and an amino group:

$$R^{1} \longrightarrow N \longrightarrow ((CH_{2})_{m'} \longrightarrow NH)_{n'} \longrightarrow (CH_{2})_{m'} \longrightarrow A'$$
 (3)

wherein

R1' represents an alkenyl or alkyl group having 30 to 300 carbon atoms,

m' represents an integer of 2 to 4,

n' represents an integer of 0 to 6, and

A' represents the ring structure, the amino group having no ring structure or the mixed structure comprising the ring structure and the amino group.

Claim 13 (Currently Amended) The lubricant composition additive according to Claim 1, wherein the succinimide compound or the boronization product thereof (B) is present in the lubricant composition additive in an amount of 10-1,000 wt. %, based on 100 wt. % of the succinimide compound or the boronization product thereof (A).

Claim 14 (Cancelled).

Application No. 10/561,368 Attorney Docket No. 281974US0PCT Response to Official Action dated December 30, 2010

Claim 15 (New) The lubricant composition according to Claim 1, further comprising one or more additives selected from the group consisting of a metal-based detergent, an antiwear agent and a viscosity index improver.
